

Green Roof Installer

Overview

Do you have a passion for the outdoors and enjoy working with plants? This technical and labour intensive position may be right up your alley. The green roof industry is growing.

Roles and Responsibilities

You will be responsible for planting vegetation, installing barriers/membranes and irrigation systems on rooftops, helping to provide insulation in the winter, improving air quality, and making our cement-laden cities just a little cooler in the summer. Sometimes, green roofs are designed by sustainable architects, but for smaller businesses, green roof installers may also play a role in the design aspect. With your knowledge of native plants and creative flair, you'll be making something that's both practical and beautiful.
