

# First Nations Energy Education Exchange

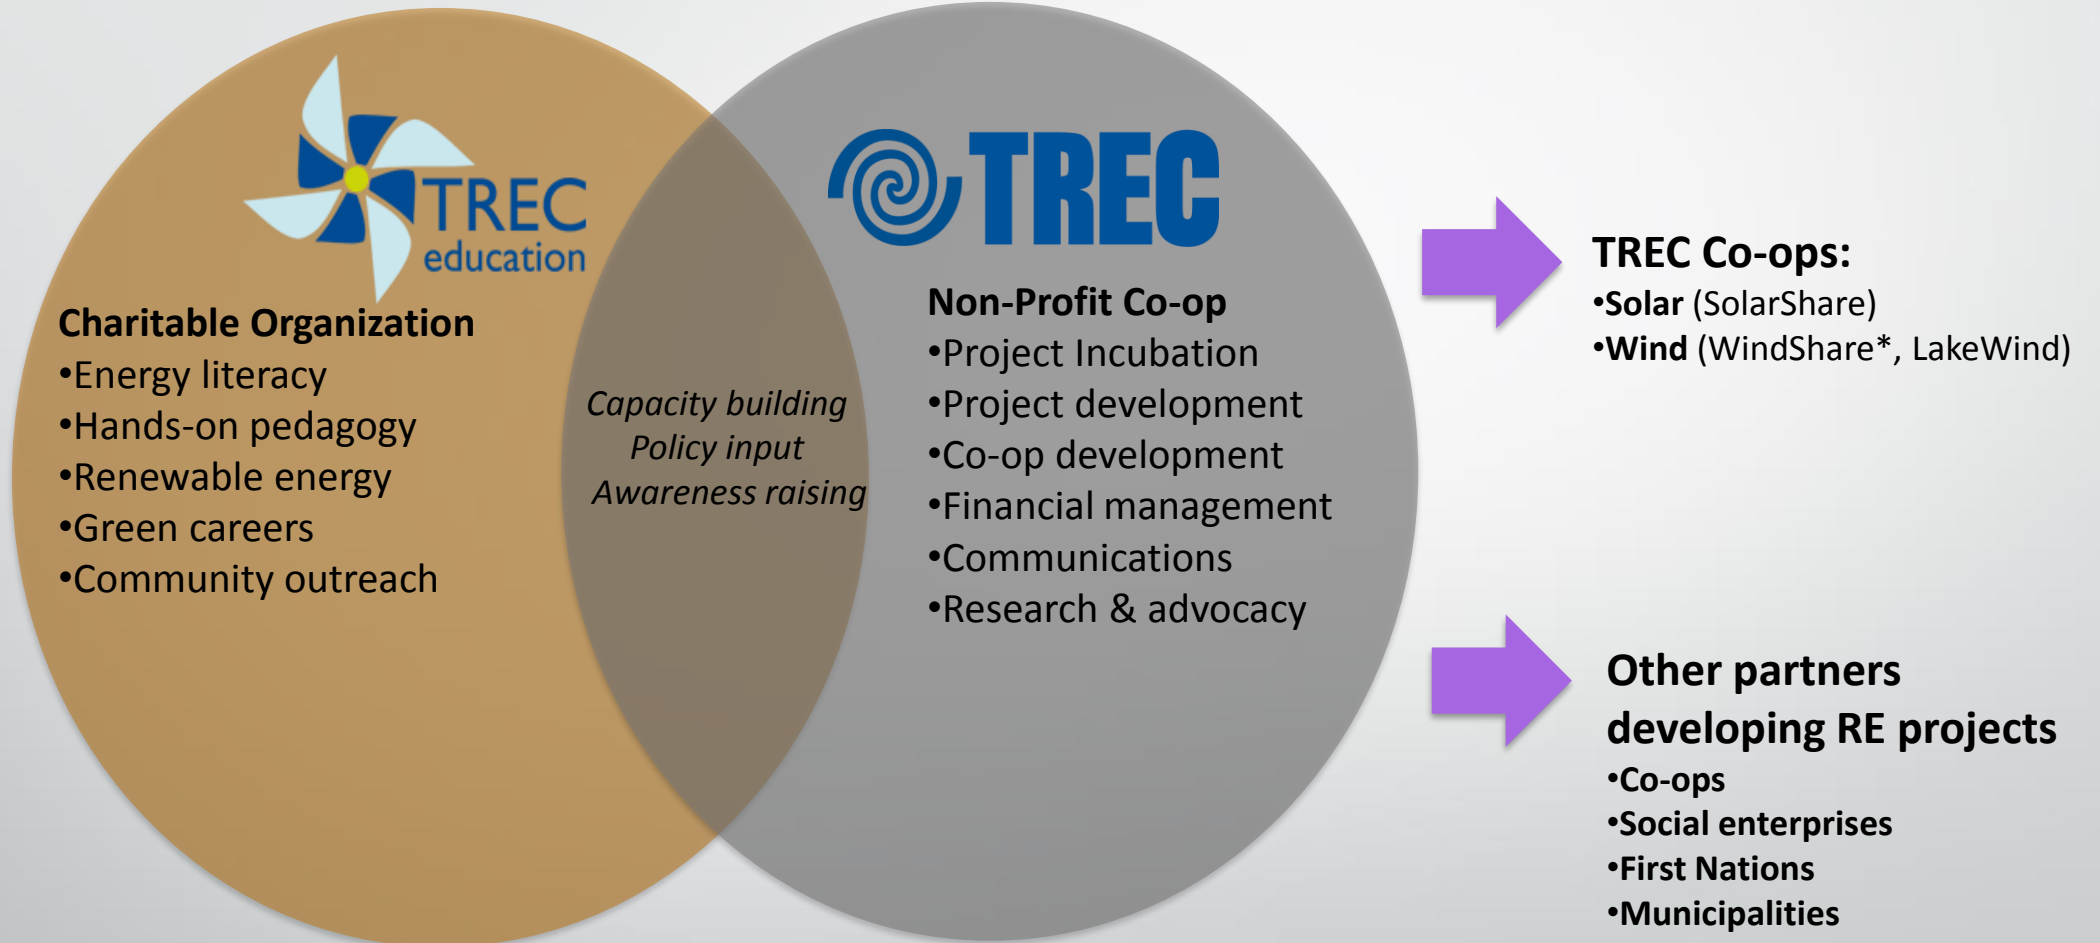

Workshop 1 – Bkejwanong Territory  
22 June 2016

# FN-EEE Program Objectives

- Facilitate knowledge sharing and collective effort
- Understand priority areas and capacity building needs
- Gather input to understand direct experiences & priorities
- Identify specific tools to address priority areas
- Turn the First Nations Electricity Report into smaller chunks (videos, webinars, slide decks, etc.)

# Who we are

# Community Power

Energy consumed  
by community or  
sold to power  
company

Communities  
develop projects

Local jobs &  
experience  
created to build  
and operate  
projects

Profit kept in  
community

# *FN Energy Opportunities / Challenges*

- Community energy planning
- Renewable energy developments (RE policy)
- Partnership requests and considerations
- Remote electrification & diesel reliance
- Transmission projects
- Economic development and self-reliance
- Employment and training

*M'Chigeeng First Nation Wind Farm*

## Lots of First Nation participation, but still many challenges

- Over 500 FIT contracts (800 MW) FN communities with
- 13 of FN communities partnering on large wind, water or solar project (XXX MW)
- Over 90 communities working on energy plans
- More than 25 communities involved in transmission-related projects

# Flow of the Day

- Perspectives on RE Project Development
- Overview of the First Nations Electricity Report
- Discussion
- Overview of RE program and funding options
- Employment & training, planning, partnerships
- Understanding capacity building needs, gathering feedback

# Resources

Materials from this workshop will be posted here:
