

Sustainable Fashion Designer

Overview

Are you a trend-setter in fashion? Are you passionate about clothing that not only looks good, but is also good for the earth? As people become more conscious of where their clothing comes from, how its made, and who is making it, there will be more demand for clothes that do not have a negative impact on human rights and the environment.

Roles and Responsibilities

Design clothing using ecologically friendly methods and materials, such as product life cycle, raw materials, manufacturing, transportation, recycling of products and components, and using renewable energy along all stages. Your job will not end once the clothing is designed. As a Sustainable Fashion Designer, it will be your job to follow that garment from its manufacturing to its display on a shelf, ensuring that all stages along the way are sustainable and eco-friendly.
